

Making a material difference in your kitchen...

A close-up photograph of a white kitchen countertop. In the upper right, a portion of a white sink is visible. A silver faucet is partially seen at the top center. Below the countertop, a white cabinet with a recessed handle is visible. The lighting is soft, creating subtle shadows and highlights on the smooth surface.

We can all dream... but BENYEEQUARTZ makes dreams a reality.
Your kitchen becomes a blank canvas, onto which you can project your personal vision. Smooth, flowing surfaces gliding along runs and curving around corners. In pure white or a colour that you love. Merging effortlessly with your chosen units and appliances. Creating an environment that's all about you...

A close-up photograph of three martini glasses resting on a light-colored, speckled countertop. The glasses are arranged in a diagonal line from the bottom left towards the top right. Each glass has a unique stem color: the one on the left has a green stem, the middle one has a lime green stem, and the one on the right has a dark brown stem. The stems have a faceted, crystalline texture. The glasses are empty, and their reflections are visible on the countertop surface.

Strong, bold and sophisticated: BENYEEQUARTZ isn't a choice for the timid. In a sea of generic kitchens, it's something different. A natural stone with a hard quartz crystal core, which translates into a deep, mesmerising beauty.

A luxurious material in a range of clear, consistent colours - including vivid hues and pure white. BENYEEQUARTZ is for people with a bit of "attitude". It might just be for you.

Sinks are integrated seamlessly.

BENYEEQUARTZ curves around corners.

Splashes of colour and under-lighting add drama.

Create a modern island that's "outside the box" by enveloping it in gently curving, pristine white BENYEEQUARTZ. Keep appliances and fittings minimal and understated. Surround your creation with space to let it bask in the limelight. And stage it against an expressive background to emphasise its pure, clean lines.

These days, we pretty much live in our kitchens. In an openplan environment, colours and materials have to blend into the overall scheme. BENYEEQUATZ complements this holistic approach. Its solid, expansive look, thoroughly contemporary colour range and easy harmony with other elements, give character and substance to the heart of your home.

With its quartz core, BENYEEQUATZ is very hard and durable.

Hemingway Design

BENYEEQUARTZ combines with wood and stainless steel for a warm, resonant look.

Hobs are neatly integrated.

Long worktops are seemingly endless.

Sometimes, less is more. The simple, clean lines of BENYEEQUARTZ imbue your kitchen with a soothing, peaceful ambiance, creating a feeling of space whatever the layout. Fitting into corners and around sinks, incorporating functional and ergonomic elements with ease, turning design headaches into design features, BENYEEQUARTZ works hard without ever seeming to.

Combining two colours of BENYEEQUARTZ creates a visual division between cooking and eating areas.

Each to their own

BENYEEQUARTZ has a strong personality, but a variety of moods. Whether your personal taste inclines towards a contemporary style with minimal details, or a traditional kitchen where distinctive dark surfaces contrast with sculptured wooden units, BENYEEQUARTZ will lend its rich aesthetic, creating a design that really stands out.

Lemon and vinegar leave no lasting mark on Zodiaq

A sink in white complements a worktop in BENYEEQUARTZ Indus Red.

Large dimension sheets minimise the need for seams.

Design Callerton kitchens

Any sink – combining any colour of BENYEEQUARTZ with a stainless steel base – is a stylish and practical solution.

While most colours of BENYEEQUARTZ have a high-gloss finish, the Concrete Block range (including Charcoal Black, below) offers a matt, urban-influenced aesthetic.

The creation of coved backsplashes or large areas without visible seams.

Matching a surface in white BENYEEQUARTZ with whitedrawers and doors – either in BENYEEQUARTZ or another material – gives a clean, contemporary look.

BENYEEQUARTZ resists household stains such as lemon juice, and retains its highly polished look without the need for sealing.

Ergonomics are key in the kitchen. With BENYEEQUARTZ, worktops can follow the angles and curves of a room or accommodate different unit heights with ease.

What is BENYEEQUARTZ?

BENYEEQUARTZ is a decorative quartz-based solid surface material, used in a wide variety of horizontal and vertical applications.

BENYEEQUARTZ is composed of 93% natural quartz, combined with polymer and natural pigments. The quartz crystals at its core give BENYEEQUARTZ a deep, inner radiance and a luxurious, highly distinctive aesthetic.

Durable

Solid and non-porous, BENYEEQUARTZ is stain- and chip-resistant. As colours and patterns run through the entire thickness of the material, if a scratch occurs, it can easily be sanded away and the surface restored to its original appearance.

Visibly seamless

BENYEEQUARTZ is joined using a special adhesive to produce a visibly seamless look. This enables the creation of large island units and long worksurfaces.

Hygienic

The non-porous quality of BENYEEQUARTZ, together with its special method of joining, makes it hygienic and easy to clean.

Long-lasting

BENYEEQUARTZZ surfaces are renewable. Most damage – such as cigarette burns – can easily be removed using ordinary abrasive cleansers and a scouring pad, and the surface fully restored to its original appearance.

Versatile by design

BENYEEQUARTZ can be routed, carved, sandblasted, moulded, thermoformed (bent when heat-treated), inlaid, or even printed to fulfil virtually any design vision. Available in around 100 colours, BENYEEQUARTZ complements many other materials, such as wood, metal and stone, enabling it to fit in with a range of design styles.

Environmentally sound

Not only is BENYEEQUARTZ durable and renewable, it can also be recycled by re-cutting and re-installing. Inert and non-toxic, with low VOC (Volatile Organic Compound) emissions, BENYEEQUARTZ has minimal impact on indoor air quality.
